DETAILED ACTION

Response to Amendments

Applicant's amendment filed on 7/11/05 has been considered and entered.

Specification

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Allowable Subject Matter

Claims 1-20 are allowable.

The following is an examiner's statement of reasons for allowance: Claim 1 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly teach or suggest the claimed integrated circuit comprising, among other limitation, a novel and unobvious limitations of "plurality of post amplifiers disposed on a single integrated chip and capable of operating one of a plurality of preselected and preset input voltage levels" structurally and functionally interconnected with other limitation in the manner as cited in claims 2-9.

Claim 10 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly teach or suggest the claimed integrated circuit comprising, among other limitation, a novel and unobvious limitations of "a switch located between the second group of post amplifier and an input power supply, wherein the first group of post amplifier is always electrically coupled to the input

power supply to receive power during normal operation" structurally and functionally interconnected with other limitation in the manner as cited in claims 11-16.

Claim 17 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly teach or suggest the claimed integrated circuit comprising, among other limitation, a novel and unobvious limitations of "auto zero circuitry for performing an auto zero function of zeroing the dc component of the received data signals; wherein the auto zero circuit does not required the use of an external capacitor to perform the auto zero function." structurally and functionally interconnected with other limitation in the manner as cited in claims 18-20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Cited References

The prior art made of record and not relied upon considered pertinent to application's disclosures. The cited references relate to subject matter of instant application.
